SUMMARY

- Full Stack Engineer experienced in building scalable MERN stack applications and SQL database schemas.
- Proficient in frontend optimization, RESTful API design, and implementing WebRTC real-time features.
- Passionate about system design, AWS cloud integration, and implementing secure coding practices.

TECHNICAL SKILLS

- **Frontend Development:** React, Tailwind CSS, HTML5, Bootstrap, jQuery
- **Backend Development:** Node.js, Express.js, RESTful APIs, Socket.IO, WebRTC
- **Languages:** JavaScript (ES6+), Python, Java, C++, SQL
- **Databases & Cloud:** MongoDB, MySQL, AWS (S3), Vercel, Docker
- **Developer Tools:** Git, GitHub, Postman, VS Code, Google Colab

EDUCATION

VIT Bhopal University

Bachelor of Technology Computer Science Engineering

Bhopal, Madhya Pradesh

Aug 2023 – May 2027

- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Web Technologies, Software Engineering, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

3 Skill

India

Web Development Intern

Jul 2026 – Sep 2026

- **Web Development:** Contributed to frontend web development initiatives and practical application of coding skills during the 2-month internship.
- **Project Collaboration:** Collaborated with team members to design and implement functional, responsive web components.
- **Technical Implementation:** Maintained adherence to professional conduct and project schedules while executing development tasks.

TECHNICAL PROJECTS

VirtuSync: Real-Time Communication Platform

Node.js, Express, PostgreSQL, Socket.IO, WebRTC

- **Low-Latency Architecture:** Engineered a video conferencing tool using WebRTC for peer-to-peer streaming, achieving sub-200ms latency for video transmission across distributed networks.
- **Scalable Signaling:** Implemented a custom signaling server using Socket.IO to handle concurrent room joins, supporting stable connections for multi-user meeting rooms.
- **Security Implementation:** Integrated JWT-based authentication and secure session management, preventing unauthorized access to private meeting streams.

AI Lead Discovery & Enrichment Platform

Javascript, Gemini 2.5, Playwright, SerpApi

- **Autonomous AI Pipeline:** Engineered an AI-driven lead generation system utilizing Google Gemini 2.5 to dynamically target, evaluate, and score B2B companies based on strategic fit and estimated revenue.
- **Data Extraction Engine:** Developed a headless web scraping architecture using Playwright and Cheerio to autonomously navigate domains, extract HTML/text payloads, and detect underlying technology stacks in real-time.
- **Deep Data Enrichment:** Integrated SerpApi for automated domain resolution and OSINT-based LinkedIn data mining, employing dynamic email formulation and Zod for strict JSON schema validation.

Backend Ledger API

Node.js, Express.js, JWT, MongoDB, Nodemailer

- **API Development:** Developed a scalable RESTful API utilizing Node.js and Express.js, structured with a modular architecture encompassing separated routes, controllers, and services.
- **Security Implementation:** Engineered secure user authentication flows, implementing token generation, logout functionality, and token blacklisting to prevent unauthorized access.
- **Transaction & Email:** Architected robust transaction processing endpoints and integrated Nodemailer to trigger automated email notifications for real-time transaction updates.
- **System Reliability:** Configured comprehensive API health check routes to monitor service status and ensure high availability.

CERTIFICATIONS & ACHIEVEMENTS

- Introduction to Machine Learning (NPTEL) - Validated understanding of algorithmic foundations.
- Business Analytics (NPTEL) - Validated understanding of data-driven decision making and analytical modeling.
